JAGUAR ECO PLUS

JAGUAR ECO PLUS

JAGUAR ECO PLUS packaging system is born from the combination of Jaguar plus bagging machine and Series ECO multi-head weigher. The whole line has been realized in order to be the most compact, flexible and price attractive packaging solution in the market.

Jaguar Plus offers the possibility to make pillow and square bottom bags. Its new design is made to house the new 10 head ECO multihead weigher, which offers the most improved technical features, as the Automatic Vibration Control, the Environment Vibration Annulment and the consecutive opening of the buckets for the same drop.

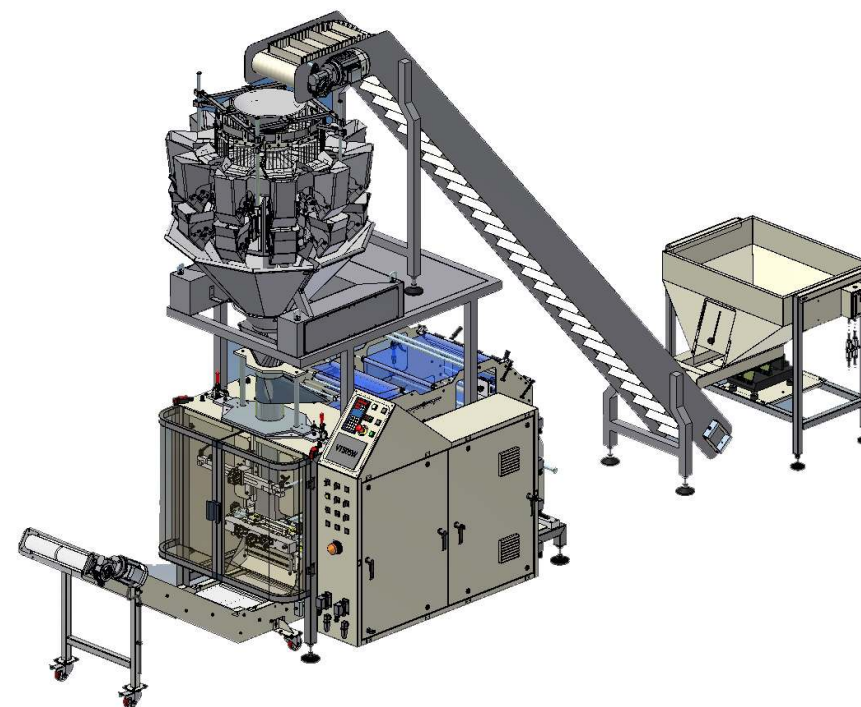

The feeding system can be placed behind or beside the packaging machine giving a flexible configuration to the whole packaging line.

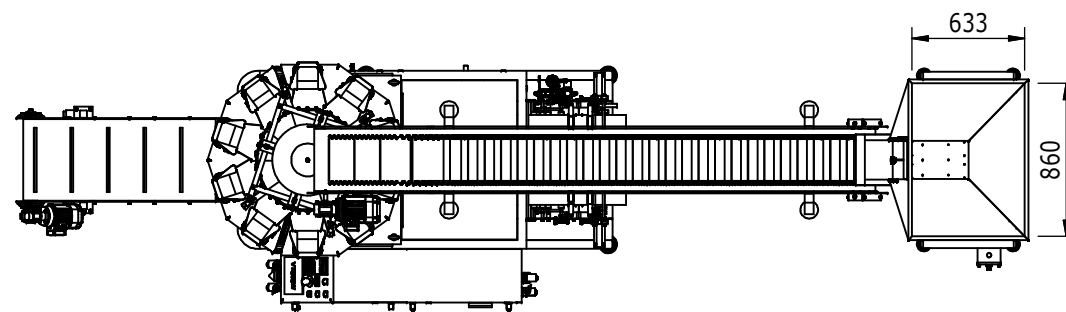

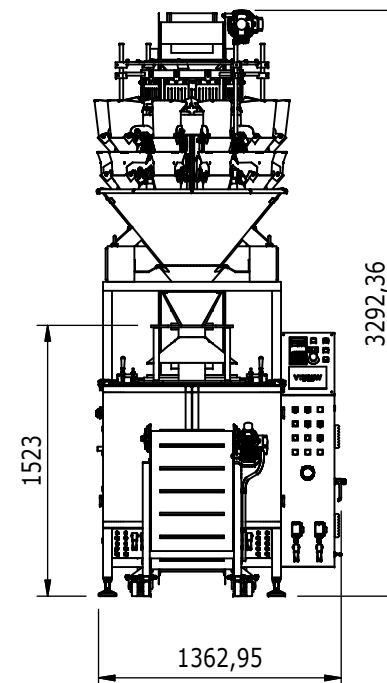

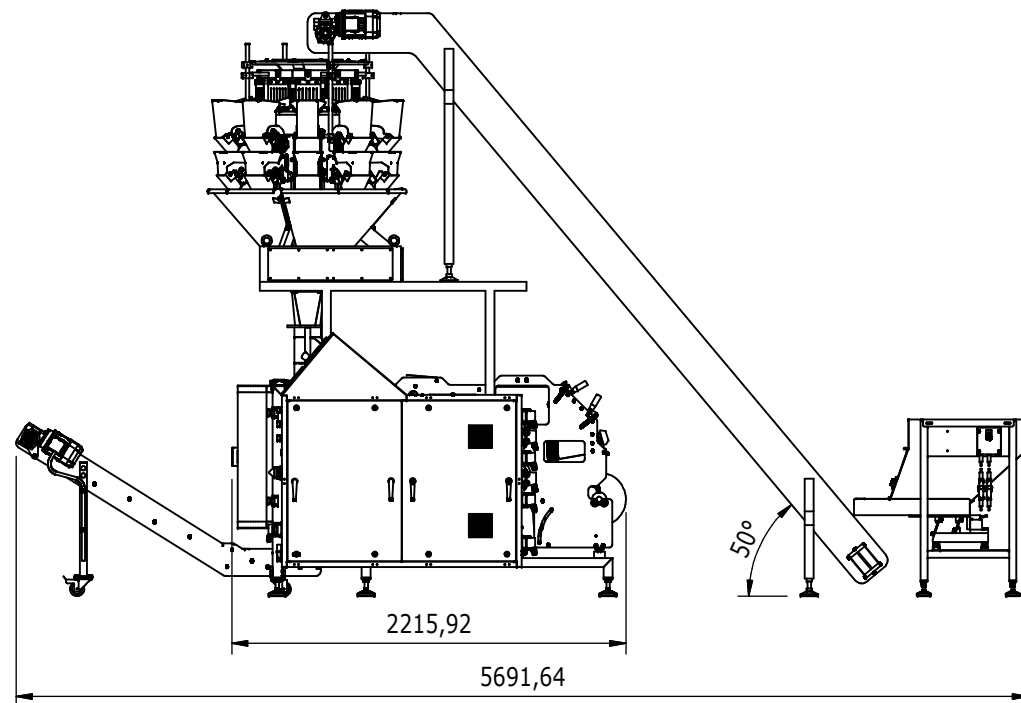

The very compact design will also reduce any time wasting during the most common maintenance operations as cleaning, sanitisation, format changeover and film reel replacement.

All the parts in contact with the products are made of Aisi 304 stainless steel. A full stainless steel version is available as option.

TECHNICAL DATA	
Model	JAGUAR ECO PLUS
Reel width	500 mm
Sealing bars	250 mm
Capacity	50 ppm
Max bag size	235 x 350 mm
Structure	Painted steel
PLC	Siemens
Pneumatic Eq.	SMC
Control	7" Multilanguage TP
Weighing buckets	1,3L (2,5L option)
Function	Pneumatic sealing – servo driven dragging
Main options	Dimple plate
	Square bottom device
	Full Stainless steel version
	MAP
	Eurohole
	40° Inclined version for fragile products
